The Four-Way Test

Is it the TRUTH?	Is it FAIR to all concerned?
Will it build GOODWILL & BETTER FRIENDSHIPS?	Will it be BENEFICIAL to all concerned?

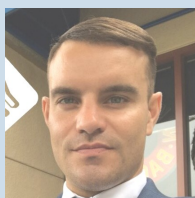

LABOR DAY

SEPT. 6th
LABOR DAY
******* NO NOON MEETING *******

Quotes about Labor

- "The big secret in life is that there is no big secret. Whatever your goal, you can get there if you're willing to work." *Oprah Winfrey*
- "Amateurs sit and wait for inspiration. The rest of us just get up and go to work." *Stephen King*
- "Your work is going to fill a large part of your life, and the only way to be truly satisfied is to do what you believe is great work. And the only way to do great work is to love what you do." *Steve Jobs*
- "There are no secrets to success. It is the result of preparation, hard work, and learning from failure." *Colin Powell*
- "Without ambition one starts nothing. Without work one finishes nothing. The prize will not be sent to you. You have to win it." *Ralph Waldo Emerson*
- "Find something you love to do, and you'll never have to work a day in your life." *Harvey Mackay*

September 13th - Botanica Sam Spallitta Human Plant Solutions

(The exclusive provider of Hemp Prosthetics)

Kyle Trivisonno's startup, now known as Human Plant Solutions, won an incubator grant in 2018 and has gone on to attract university research funding and industry R&D partnerships. Co-Founder Sam Spallitta has worked heavily in the medical device and hemp industry giving him a strong network and the adaptability to navigate this new market and its exponential growth.

Using natural fiber, Human Plant Solutions has created a patent pending alternative to often caustic, high cost, conventional ultra light composites for prosthetic and device manufacturing. In just four years, things have gotten very interesting for the hemp prosthesis. Through sustainable manufacturing, mobile patient care, fast turnaround times and competitive rates, HPS has created an ecosystem that caters to patients, practitioners and technicians. Hemp is 10 times stronger than carbon when properly laminated. It's also far more supple and therefore resistant to cracking. The natural fiber is lighter and less corrosive than carbon and fiberglass. The goal of Human Plant Solutions is to improve lives and to move into other markets that can and will develop products proudly labeled "Made in the USA".
